REPORT NO. [REDACTED]

## INFORMATION REPORT

CD NO. 25X1A

COUNTRY USSR (Estonian SSR)

DATE DISTR. 5 Jan. 1950

SUBJECT Airfield Southeast of Tallinn

NO. OF PAGES 1

PLACE 25X1A

ACQUIRED [REDACTED]

RETURN TO CIA LIBRARY

NO. OF ENCLS.  
(LISTED BELOW)

DATE OF INFO [REDACTED]

SUPPLEMENT TO  
REPORT NO. [REDACTED]

25X1X

1. The about 6,500-foot square airfield, about 3,300 feet southeast of the TALLINN (24°45'E/59°26'N) town limits, had two concrete runways forming a T. Two hangars with a concrete apron in front were located in the southern section of the field. There were two multi-storied buildings between the hangars.
2. There was intensive flying at the field. About thirty twin-engine aircraft took off from the airfield and practiced flying over the town almost daily. Description: radial engine, rounded-off trapezoidal wings, single rudder assembly. This aircraft type was most frequently observed. At least a hundred aircraft were parked on both sides of the runway.

25X1A

- a. Report supplies supplementary details on the location, condition, and occupation of the TALLINN-UTLUSKISTE airfield. According to previous reports, a naval pilot school was assumed to be located at the airfield. This assumption is supported by the intensive flying reported. The twin-engine aircraft are probably Il-4s.
- b. Further information on the occupation of the field is required.
